## Stryker Medical Education

Contour Workshop

### **Catheter lab-based, product training course**

Course agenda

**Thursday 27<sup>th</sup> November – Friday, 28<sup>th</sup> November 2025**

Magdeburg, Germany

This Medical Education program is designed for qualified physicians experienced in intrasaccular approaches within the neurovascular field, but with limited hands-on use of the Contour Neurovascular System™ (0–3 cases).

The objective is to support physicians in preparing for and reviewing the indicated use of the device. The program includes:

- An overview of the intrasaccular therapy landscape
- Case selection, sizing, positioning, and deployment with the Contour device
- Discussion of clinical studies, real-world cases, and follow-up considerations

You specialise in your patients.

**We specialise in you.**

With kind support from:

**SIEMENS**  
**Healthineers**

Contour Workshop

## **Catheter lab-based, product training course**

A physician must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery. The information presented is intended to demonstrate the breadth of Stryker product offerings.

A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets.

Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.

You specialise in your patients.
