- Degree: Second Level Master in Interventional Oncology

TESTIMONIAL

“The Master’s program in Interventional Oncology is highly recommended. It provides unique insights into two internationally leading centers for minimally invasive tumor therapies, each with distinct areas of specialization. This broadened my professional horizon tremendously. Workshops, innovation updates, and the exchange with international colleagues made the experience invaluable. I am certain these new connections will benefit me for many years to come.”

Vanessa S. - participant MIO 2025
